-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The application filed August 4, 2003 is presented for examination and claims 1-4, 13-20, and 26-38 are pending.

***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 13-20, and 26-38 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,630,925. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claimed invention is somewhat a broader recitation of "925 Patent. For instance, in claims 1, 26, and 32 of the present claimed invention and claims 1, 8, 14, and 15 of the "925 Patent, the application claims:

Regarding claims 1, 26, and 32, the present invention claims the circuit connector can be attached to the device connector in a first attaching position to allow a user to access the first plurality of keys and in a second attaching position to allow a user to access the second plurality of keys but the "925 Patent teaches wherein the first keymat is capable of activating the circuit board only when the keyboard is oriented in a first direction, and the second keymat is capable of activating the circuit board only when the keyboard is oriented in a second direction different from the first direction.

Thus, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to know that "the first keymat is capable of activating the circuit board only when the keyboard is oriented in a first direction, and the second keymat is capable of activating the circuit board only when the keyboard is oriented in a

second direction different from the first direction" as taught by "925 Patent can be rephrased to read as "the circuit connector can be attached to the device connector in a first attaching position to allow a user to access the first plurality of keys and in a second attaching position to allow a user to access the second plurality of keys" as disclosed in the present invention.

Regarding the rest of the dependent claims, all the limitations can be found in the patented claims.
